CAREER OBJECTIVE

Electronics & Communication Engineering undergraduate seeking a role as Telecommunications engineer / Embedded Software / FPGA Design / AI Architect Engineer. Offering hands-on experience with Verilog, Vivado, Cadence, HFSS, Arduino, embedded microcontrollers, and AI/ML systems, backed by certifications from Qualcomm, Ericsson, and CISCO — and direct experience handling 5G RAN and Core infrastructure.

CORE TECHNICAL COMPETENCIES

VLSI & Hardware Design	Embedded Systems	5G & RF Technology
Verilog HDL (Basic). Xilinx Vivado	Arduino IDE, IoT System Design	5G Core & RAN Management
Cadence (Schematic/Layout)	Microcontroller Integration	RF & Antenna Basics (HFSS)
Proteus Circuit Simulation	Relay & Sensor Systems	5G Protocol Stack
AI/ML Integration	Software Tools	Domain Knowledge
Qualcomm AI Upskilling (Certified)	Docker Python HTML/CSS/JS	Digital & Analog Electronics
Arduino Sensor-based ML Inference	Linux (Ubuntu) Windows	Digital & Analog Communication
NVIDIA AI Arch. fundamentals		CMOS

KEY PROJECTS

Smart Health Monitoring & Accident Prevention System for Cars · [Final Year Project](#)

- Designing a real-time IoT-based embedded system integrating multiple physiological and vehicular sensors for continuous health monitoring and collision prevention.
- Implemented microcontroller-based decision logic, sensor data processing pipelines, and alert actuation.

AI-ML Smart Tourism Safety & Intrusion Detection System · [5G Lab Project](#)

- Built an intelligent security system combining AI/ML inference with sensor networks and 5G connectivity for real-time intrusion detection and automated alert triggering.

5G Network Visualization Tool · [College of Technology, GBPUAT](#)

- Designed and deployed an interactive web application demonstrating 5G core architecture, protocol stack, and related technologies (HTML, CSS, JavaScript, JSON).
- Developed as part of 5G USE CASE LAB operations; live-deployed and presented to faculty and industry visitors.

Arduino Obstacle Avoider Bot · [Personal Project](#)

- Designed and programmed an autonomous navigation robot using ultrasonic sensors, real-time distance measurement, and servo-based obstacle avoidance in Arduino C.

Magnetic Reed Switch Proximity Detection System · [Personal Project](#)

- Built a hardware security system using magnetic reed switch sensors for proximity-based door lock detection.

Home Appliance Automation System · [Personal Project](#)

- Developed a full automation system using relays, microcontroller firmware, and a mobile application interface.

PROFESSIONAL EXPERIENCE

Back-end Member — 5G USE CASE LAB · [College of Technology, GBPUAT](#)

Oct 2024 – Jul 2026

- Handled and maintained 5G Radio Access Network (RAN) and 5G Core infrastructure for the university's dedicated 5G lab.
- Developed 4 functional 5G use cases integrating hardware sensors, embedded systems, and network protocols.
- Collaborated with Ericsson and Qualcomm-certified knowledge bases to implement practical 5G deployments.

Member, Branch Chapter of ECE — Electronika · [College of Technology, GBPUAT](#)

Oct 2023 – Jul 2026

- Organized and led multiple inter-branch technical events; developed project management and cross-functional team skills.

EDUCATION

B.Tech — Electronics & Communication Engineering

[College of Technology, GBPUAT, Pantnagar](#) | CGPA: 7.368 / 10

Sept 2022 – Jul 2026

Secondary & Senior Secondary School

[Kendriya Vidyalaya F.R.I., Dehradun](#) | 10th: 97.8% · 12th: 96.6%

Jul 2019 – Aug 2021

CERTIFICATIONS

AI Upskilling Hands-On Development	Qualcomm
AI Upskilling	Qualcomm
5G Technology	Qualcomm
5G Technology	Ericsson
Cybersecurity & Packet Tracer	CISCO
Introduction to Aerospace	NPTEL
Embedded Systems- ESD ARM Cortex M4	PANTECH.AI

Telecom Technologies	BSNL, Haridwar	15 days on-site	Aug 2023
CNC & Welding Technologies	BHEL, Haridwar	28 days on-site	Jun 2025
Aerospace & Space Technologies	India Space Labs	45 days remote	Jun 2025
Power Transmission	PTCUL, Rishikesh	15 days on-site	Jul 2025
Railways S&T Technologies	RVNL, Rishikesh	15 days on-site	Aug 2025
